**Occupational Therapist Month**

"I choose OT after watching how the skilled approach that occupational therapy can changes lives and improves all aspects of a persons life. My brother had a TBI and I witnessed first hand the power of occupational therapy."

"I have many accomplishments in life and hope to continue with more! My daughters are what bring me the most pride; I love seeing them become amazing women. They will make the world a better place! I am also proud who I have become, both personally and professionally. I give my best everyday and am grateful for this life I get to live. I am thankful for my role here at HHHOK and that I applied two years ago and was offered my position."

"I am surrounded by a team of colleagues that care as much as I do and that I can count on. That is hard to find these days in healthcare. I am proud to be a part of the team!"
